

PlayGround | Firmware exposure and update readiness

September 28, 2026 | Snapshot 10:57 AM ET | 74 devices across the PlayGround tenant

This report shows firmware exposure and update readiness. It is not a confirmed CVE check.

DEVICES 74	MODEL GROUPS 48	0.0.0 TO VERIFY 52	BLANK / MISSING 0	OLDER THAN PEERS 5
---------------	--------------------	-----------------------	----------------------	-----------------------

Rooms to review first

Priority is the count of devices with a missing/unverified version or a version older than an observed peer of the same reported manufacturer and model. This is an inventory signal, not a vulnerability score.

ROOM / SPACE	FLAGGED	0.0.0 / MISSING	OLDER	AFFECTED DEVICES (EXAMPLES)
New-York/Domotz/Xyte Office	36	36	0	Boris-Pro, MMobile, Tals-MacBook-Pro (+33 more)
New-York/Unsorted	3	2	1	Domotz, 02:42:DD:52:99:74, Test
Taipei/Unsorted	2	2	0	C930e, Test
Poly Lens/Poly Lens 2/Xyte	1	1	0	Johnny's IP phone
Tel-Aviv/Zoom 2/San Fransisco/Omer's Room	1	1	0	Omer's Room
Tel-Aviv/Zoom 2/Tel Aviv/KFC	1	1	0	Xyte IL (R1)
noam/Shure 2/Unsorted	1	1	0	MXA920-S

Devices assigned to site-level spaces: Tel-Aviv (6); Cork (3); Bangkok (2); New-Jersey (1). These appear in the device inventory but are not ranked as rooms.

Recommended next steps

1. Verify whether 0.0.0 means absent firmware telemetry, starting with Xyte Office (36 flagged devices).
2. Check vendor release notes and security advisories for Edge 1.2.6 / 1.3.6 and Domotz Agent 6.3.3-b001 before planning updates.
3. Confirm room assignment for site-level devices, capture real firmware values, and rerun the inventory.

Method: exact 0.0.0 is treated as unverified; it is not asserted to be a confirmed firmware version. Peer comparisons use numeric dotted versions (optional -bNNN suffix) only within exact reported manufacturer + model groups. The highest observed peer is not the vendor latest. Reported manufacturer names are not normalized.

Firmware versions by manufacturer and model

All 48 reported manufacturer + model groups. Counts include every PlayGround device. "0.0.0 (verify)" is reported by the API and needs validation.

MANUFACTURER	MODEL	DEVICES	VERSIONS IN USE (DEVICE COUNT)	TO VERIFY	OLDER PEERS
Not reported	Logitech Device	1	0.0.0 (verify) - 1	1	0

Device inventory

Every PlayGround device. "Site" marks a customer/site-level space rather than a room. Older means behind the highest version observed on a same-manufacturer, same-model peer.

DEVICE	MANUFACTURER	MODEL	ROOM / ASSIGNED SPACE	FIRMWARE	FLAG
Scott K Test	Xyte Edge	Edge	Bangkok [site]	1.2.6	Older than peer
