FLEET AT A GLANCE

DEVICES	74 total	3 online / 14 offline / 57 unavailable	18.9% offline
SPACES	270 total (244 room-type)	INCIDENTS	39 active / 1191 closed
OPEN TICKETS	0		

CHANGE SINCE YESTERDAY

12 new incidents in the latest 24h vs. 3 in the preceding 24h; all 12 were in Cork.
11 of those 12 are now closed; the MM Agent Edge-offline alert remains active.

Method: room problem count adds active incident records and offline device records; these may overlap.
Only spaces typed "room" appear in the ranked list; critical alerts attached to sites are shown above.
"Unavailable" is the API device status, separate from online and offline. No prior fleet snapshot was available to verify net changes in device or space counts. Source: xyte-cli; full responses in the companion JSON.
